

LightSheer®

Gold-Standard Diode Laser Technology for Hair Removal

The world's most clinically proven and accepted system for photoepilation

- **FDA cleared** for permanent hair reduction on all skin types (I-VI) and tanned skin, and treatment of PFB
- **Unique output control** enables treatment of nearly every hair diameter and color
- **Advanced sapphire contact ChillTip™** ensures patient comfort and safety by providing integrated contact cooling of the epidermis before, during and after the laser pulse
- **Built-in calibration** yields precise energy delivery every time
- **Proven diode reliability** and robust system design ensure patient treatments take place on schedule
- **No consumables** means results are achieved with a low cost of ownership
